TITLE of INVENTION: Shower Safety Ring

DETAILED DESCRIPTION: While showering elderly people can become disoriented and fall or slip and fall. By standing in the soft Shower Safety Ring a fall can be broken and help prevent injury. Handicap and others may also benefit from this device which slides horizontally or vertically. It also folds down when not in use and is out of the way.

CLAIMS: The Shower Safety Ring can help save lives and prevent or reduce injuries to elderly or disabled persons who have trouble stabilizing themselves while in the shower. By standing inside the Shower Safety Ring falls can be reduced or prevented altogether and no more contact with the hard tile floors found in showers. Anyone could use the Shower Safety Ring while showering to prevent instability and falling from soapy floors or other unforeseen reasons.

ABSTRACT of DISCLOSURE: Disclosure document attached.
